

Your Yellow Iron Works Non-Stop.

So Should Your Coverage.

Mining contractors can't afford downtime. When your excavator, loader, or dozer goes down, your crew stops and your margins disappear. MineTrans keeps your yellow machinery insured —so you're never caught off guard.

Three Ways to Insure Your Equipment

Agreed Value

You and MineTrans agree on what the equipment is worth today. No appraisals at claim time—just a straightforward payout when something goes wrong.

Best for: Equipment you know well

Market Value

Coverage based on current fair market price for your specific make, model, and condition. Adjusts with market fluctuations and age of equipment.

Best for: Flexible, market-aligned

New Replacement Value

Full protection to replace your machine with brand new equivalent. Maximum coverage for critical equipment that can't afford to be out of service.

Best for: Core revenue equipment

We Allocate Professionals to Determine the Correct Replacement Value

This is what sets MineTrans apart. We don't guess. We send specialists who understand mining equipment to inspect your machinery, assess its true value, and ensure you're covered for exactly what it's worth.

1

You contact us with equipment details

2
